Boston, Printed by B. Green, & J. Allen Sold at the
Printing-House at the South End of the Town 1701.

Friendly Readers,

I Have now served you with an Almanack twice Seven years, & so often given you the liberty to toss my name about by censure & applause: and have once again (being desired) more than I intended served you this year; but whether it may be acceptable I know not, because another Ingenious person hath undertaken the work. & may excel in this Service, in accommodating you yearly with something new that may be more pleasing. However, I have endeavour'd yearly (according to what a Sheet of Paper would contain) put in such things as are needful & necessary to be inserted, and what vacant room I have had to spare something new: and if what I have as for this year inserted may be well accepted, I shall be encouraged according to my ability (while I am able) to Serve you yet longer, otherwise I am willing to be released of this work considering my age. I hope I have added nothing but what may be allowed to be Printed this year as well as the last; if any Errors of mine appear, you ought to pardon them according to the Poet.

Let him that faultless finds himself, declare
Faultless to be, or else to carp forbear.

THere will be Four *Eclipses* this year, two of the Sun and two of the Moon: The first will be of the Sun the 27 of Jan. about 6 at n. in 19 d. of æ , not visible to us. The 2d will be of the Moon partial, the 11. of February in the Evening in 4 degr. 16 min. of Virgo, which will be visible to us if the Weather permit; which from the Tables of the Learned Vincent Wing & Mr. Gadbury, is thus Calculated. With a Figure of the Eclipse as it will appear in the East after Sun set.

The beginning 5 hours

The middle 6 hours

The End 8 hours

The whole time of first to last will be

The digits Eclipsed 6

30 min. } In the
47 min. } Evening
4 min. }

Continuance from
2 hours & 34 mi
& 6 min. 35 Sec

The 3d will be of the Sun July the 24 about 5 in the mor. The 4th will be of the Moon, August 7 about 9 in the morning both invisible to us. Besides these *Eclipses* there will happen no more than ordinary yearly Conjunctions & Aspects of the Planets; but in 1702. & in 1703. there will be many Remarkable Conjunctions of Saturn, Jupiter & Mars, worth the taking notice of, because the like hath not been known in this age as to the time & place of the Zodiack that they will happen in, which doubtless may be the Fore-runners of great changes & alterations in the World; sometimes a little before, or soon after such Conjunctions, there hath appeared Comets or Blazing Stars, as hath been experienced heretofore; but of these things those that will be employed in this work will be able to give you a better account hereafter.

For,

I Dread to touch at State Affairs, for fear
Least that Apollo pull me by the Ear;
I'm safe while moving in my proper Sphere,
In Plowing, Planting, there's no Treason there.

None can Predict particulars from the Stars,
By Rules of Art, either of Peace or Wars;
But Generals may be hop't upon, most Times
If warily considered in the Signs.

Of the Four Quarters of this Year, 1701.

THE Spring Quarter begins the 9th of March, and continues till the 10th of June; if this quarter be Wet and Rainy, tis natural and suitable. Summer Quarter begins the 10th of June, and ends the 12th of Sept. If the Weather be dry, tis seasonable & natural, but if Wet, tis unnatural, & bodes a sickly Autumn. Autumn called the Fall, begins the 12th of Sept. & ends the 10th of Dec. Winter Quarter begins the 10. of December, & continues till the 10. of March next year.

See how the silly Sapless Trees do shiver,

For want of Kingly Sol, their comfort giver.

 The bright shining Planet *Venus*, is our Morning Star this Year, till the 12th. of June, and from thence our Evening Star to the years end.

Of Blood Letting, &c.

IN Youth let Blood from the Change to the First Quarter; In Middle Age from the first quarter to the Full; In Elder Years from the Full to the last quarter; In old Age from the last quarter to the Change: But under the Age of 14. & above the Age of 56. it is not good to Bleed at all. Again, in Dog-day it is very hurtful to take Physick at all, unless there be great need; in such a case the disease being desperate, the cure must be adventured. Purge when the Moon is in one of these three Signs, *Cancer*, *Scorpio* or *Pisces*, & it will be sure to work the better; for in a moist sign the humors of the Body are then stirred up & down, and the better purge out, in this case, it cannot be amiss to prepare humors by something that's heating: let this be done when the Moon is either in *Gemini*, *Libra*, or *Aquarius*. Take a Vomit that it may work thoroughly, when the Moon is in *Aries*, *Taurus* or *Capricorn*; and in letting of Blood as aforesaid, beware the sign be not in that part of the Body which is let Blood, but rather at a considerable distance therefrom.

Advertisement. *There may speedily be published a Book of a small Price, about Military Discipline, being the compleat Soldier, or Expert Artillery-Man, containing the Exercise of the Market, & divers ways of Exercising a Company, &c. Sold by N. Boone over against the old Meeting House in Boston.*

Condition On Receipt: The sewn pamphlet had no binding. The pages were torn, dirty, discolored, stained, acidic and weak. The inks tested appeared stable in water.

Treatment: The volume was microfilmed. The volume was collated and disbound. The inks were tested for solubility. The head, tail and pages were dry cleaned and washed and then buffered (deacidified) with magnesium bicarbonate solution. Tears were mended and folds guarded with Japanese paper and rice starch paste. The volume was re sewn with linen thread. The volume was case bound in handmade paper colored with acrylic pigment. A leather label was stamped in gold foil.
